CONTENTS OF VOLUME 223

No. 1 *May* 1972

PAGE

Calcium uptake and force development by skinned muscle fibres in EGTA buffered solutions. By L. E. Ford and R. J. Podolsky . 1

Intracellular calcium movements in skinned muscle fibres. By L. E. Ford and R. J. Podolsky 21

Eating caused by 6-hydroxydopamine-induced release of noradrenaline in the diencephalon of the rat. By K. D. Evetts, J. T. Fitzsimons and Paulette E. Setler 35

The isolation of a renally active substance from arterial blood. By Mary F. Lockett and R. W. Retallack 49

Hypothalamic endogenous noradrenaline and thermoregulation in the cat and rabbit. By W. I. Cranston, R. F. Hellon, R. H. Luff and M. D. Rawlins 59

The release of prostaglandins and progestin into the utero-ovarian venous blood of guinea-pigs during the oestrous cycle and following oestrogen treatment. By F. R. Blatchley, B. T. Donovan, E. W. Horton and N. L. Poyser 69

Psychophysical estimates of visual pigment densities in red-green dichromats. By S. S. Miller 89

Constrictor and compliance responses of some arteries to nerve or drug stimulation. By J. S. Gillespie and R. M. Rae 109

Counting every quantum. By B. Sakitt 131

The effect of voltage on the time course of end-plate currents. By K. L. Magleby and C. F. Stevens 151

A quantitative description of end-plate currents. By K. L. Magleby and C. F. Stevens 173

The interactions of fibrinogen and dextrans with erythrocytes. By M. Rampling and John A. Sirs 199

Inotropic responses of the left ventricle to changes in aortic arch pressure in anaesthetized dogs. By R. Hainsworth and F. Karim 213

The initiation of platelet thrombi in normal venules and its acceleration by histamine. By Nicola A. Begent, G. V. R. Born and D. E. Sharp 229

Release of 5-hydroxytryptamine from caudate nucleus and septum. By R. B. Holman and Marthe Vogt 243

Release of transmitters on stimulation of the nucleus linearis raphe in the cat. By Ruth Ashkenazi, R. B. Holman and Marthe Vogt 255

No. 2 *June* 1972

PAGE

Effect of acid-base alterations on hepatic lactate utilization. By PHILIP J. GOLDSTEIN, DANIEL H. SIMMONS and DONALD P. TASHKIN 261

Ionic fluxes and permeabilities of cell membranes in rat liver. By M. CLARET and J. L. MAZET 279

Direct intracellular pH measurement in rat and crab muscle. By MICHEL PAILLARD 297

The effect of previous dietary intake of calcium on calcium absorption in rats. By J. R. KEMM 321

The dependence of the latency relaxation on sarcomere length and other characteristics of isolated muscle fibres. By LOUIS A. MULIERI. 333

The mechanical efficiency of treadmill running against a horizontal impeding force. By B. B. LLOYD and R. M. ZACKS 355

Absence of compensatory renal hypertrophy in baboons. By S. E. DICKER and CHRISTINE A. MORRIS. 365

Foetal placental blood flow in the lamb. By J. JOB FABER and THOMAS J. GREEN 375

Factors affecting the maturation of glomerular filtration rate and renal plasma flow in the new-born dog. By LEONARD I. KLEINMAN and RONALD J. LUBBE 395

Factors affecting the maturation of renal PAH extraction in the new-born dog. By LEONARD I. KLEINMAN and RONALD J. LUBBE. 411

The functional organization of the isthmo-optic nucleus in the pigeon. By A. L. HOLDEN and T. P. S. POWELL 419

Dogfish ganglion cell discharge resulting from extrinsic polarization of the horizontal cells. By KEN-ICHI NAKA and PAUL WITKOVSKY 449

The effect of low temperature on the excitation-contraction coupling phenomena of frog single muscle fibres. By CARLO CAPUTO 461

The time course of potassium contractures of single muscle fibres. By CARLO CAPUTO. 483

Sodium dependence of the inward spread of activation in isolated twitch muscle fibres of the frog. By F. BEZANILLA, C. CAPUTO, H. GONZALEZ-SERRATOS and R. A. VENOSA 507

PAGE

The role of the solitary and paramedian reticular nuclei in mediating cardiovascular reflex responses from carotid baro- and chemoreceptors. By MITSUHIKO MIURA and DONALD J. REIS . . . 525

Post-stimulus hyperpolarization and slow potassium conductance increase in *Aplysia* giant neurone. By M. S. BRODWICK and D. JUNGE 549

Comparison of the hyperglycaemic and glycogenolytic responses to catecholamines with those to stimulation of the hepatic sympathetic innervation in the dog. By A. V. EDWARDS and MARIAN SILVER 571

Potassium activated phosphatase from human red blood cells. The effects of p-nitrophenylphosphate on cation fluxes. By P. J. GARRAHAN and A. F. REGA 595

No. 3 *June* 1972

Thermoregulatory effects of intraventricular injection of noradrenaline in the mouse and the influence of ambient temperature. By SHEILA L. HANDLEY and P. S. J. SPENCER 619

Preliminary observations on the mechanical and electrical activity of the rat ureter. By A. R. TINDALL 633

The actions of dibutyryl cyclic adenosine 3′,5′-monophosphate and methyl xanthines on pancreatic exocrine secretion. By R. M. CASE and T. SCRATCHERD 649

Cyclic adenosine 3′,5′-monophosphate concentration in the pancreas following stimulation by secretin, cholecystokinin-pancreozymin and acetylcholine. By R. M. CASE, M. JOHNSON, T. SCRATCHERD and H. S. A. SHERRATT 669

Transport of calcium in the perfused submandibular gland of the cat. By S. PORS NIELSEN and O. H. PETERSEN 685

Effects of sugar and amino acid transport on transepithelial fluxes of sodium and chloride of short circuited rat jejunum. By B. G. MUNCK 699

Heat production and fluorescence changes of toad sartorius muscle during aerobic recovery after a short tetanus. By ANNE GODFRAIND-DE BECKER 719

The efflux of calcium from single crab and barnacle muscle fibres. By C. C. ASHLEY, P. C. CALDWELL and A. G. LOWE . . . 735

PAGE

Permeability of urinary bladder of *Rana cancrivora* to urea in the presence of oxytocin. By MIOW-MIOW CHEW, ANNIE B. ELLIOTT and H. Y. WONG 757

The uptake and hydrolysis of *p*-nitrophenyl phosphate by red cells in relation to ATP hydrolysis by the sodium pump. By D. COTTERELL and R. WHITTAM. 773

The effects of anaesthetics on synaptic excitation and inhibition in the olfactory bulb. By ROGER A. NICOLL 803

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

18–19 *February* 1972

DEMONSTRATIONS

	PAGE
Caro, C. G. & Nerem, R. M. Technique for study of transport of material between perfusing serum and arterial wall	1*P*
Bloice, J. A. Contactless apnoea detector using low energy radar	3*P*
Hearse, D. J. & Mullins, A. J. An isolated perfused working guinea-pig heart preparation	4*P*
Seed, W. A. A catheter-tip hot-film probe for the measurement of aortic blood velocity in man	5*P*
Hems, D. A. & Whitton, P. D. Glycogen deposition in the isolated perfused rat liver	6*P*
Miller, S., Skeaping, A. & van der Burg, J. Patch system for interfacing inputs and outputs of electrophysiological apparatus	7*P*
Davis, Jane, Schroter, R. C. & Sudlow, M. F. The investigation of the effects of gas density and viscosity on the physics of flow in small airways during forced expiration	9*P*
Clark, R. P., Cox, R. N. & Toy, N. A surface plate calorimeter for measuring local heat transfer in free and forced convection within the human micro-environment	10*P*
Rookledge, K. A. Perfusion of the isolated diaphragm and hind limb of the rat	12*P*
Olson, D. E. & Parker, K. H. A pulsed wire probe for the measurement of low velocity flows (T)	13*P*
Parker, K. H., Rothschild, M. & Schroter, R. C. High speed cinematography of a jumping flea	13*P*
Gordon, M. A modular instrumentation system	13*P*
Gordon, M., Oxenham, R. K. C. & Seed, W. A. An experimental F.M. recording system based on a low-cost cassette tape recorder (T)	14*P*

COMMUNICATIONS

Ikeda, Hisako & Wright, M. J. Differential effects of defocused images on the receptive field of central and peripheral retinal ganglion cells.	14*P*
Buchanan-Lee, Biddy, Clarke, Rufus M. & Hardy, R. N. The influence of environmental lighting on the uptake of macromolecules by the new-born rat intestine	16*P*
Iliff, L. D., Olson, D. E. & Sudlow, M. F. The organization of air flow in a cast replica of the human central airways	17*P*
Merrill, E. G. Temporal patterns of antidromic invasion latencies for the respiratory neurones of nucleus retroambigualis in cats	18*P*
Goldsworthy, G. J. & Mordue, W. Neurosecretory hormones in locusts	20*P*
Maroudas, A. Physical chemistry and the structure of cartilage	21*P*
Swanson, S. A. V. Lubrication of synovial joints	22*P*
Kempson, G. E. Mechanical properties of articular cartilage	23*P*
